

Welcome to the August 2022 edition of Sudarshan's 'Color by Design' quarterly newsletter. We are very proud to announce that Sudarshan Chemical Industries Limited has been certified with a globally recognized **EFfCI GMP** (as per Cosmetic Ingredients, 2017 standard). Now our manufacturing sites at Roha & Mahad are EFfCI GMP certified for Manufacture of Mica based pigment products and Black Iron Oxide for use as Cosmetic Ingredients.

For finished cosmetics manufacturers (customers), the benefits of choosing a supplier with EFfCI GMP certification include; a) the supplier meets an independently audited and world-wide, quality standard b) a common standard of Quality Management Systems (QMS) and operations across all suppliers with EFfCI GMP c) knowing that end-user requirements and expectations are addressed.

Stimulating Pinks and Co-existence-Microtrends

Stimulating Pinks contains a series of pink shades which will not fail to delight, bringing a positive emotional response & stimulate the senses in a way like no other colors. Pink as a tone is hard to achieve naturally and rare in nature, it almost always has some form of manmade input to create the tone we all associate with the colour (to create this range we used a carmine containing Prestige Ruby as a key pigment).

Co-Existence, focuses on bio-centric design, emphasizing the beauty and power of nature's colors and patterns, celebrating and partnering with nature rather than competing. Through this we recognize the connection we have with nature and the biosphere.

Blends Composition Stimulating Pinks

Pink Lemonade 16-1735
Prestige Ruby (35469) **50%**
